Re: Domestic Sewage Flow Update

Please be advised that effective immediately, The City of Kitchener is revising the domestic sewage flow from 350 litres per person per day (L/p/d) to 305 L/p/d for design purposes to better reflect current water and wastewater trends.

The Region of Waterloo is currently undertaking a Wastewater Treatment Master Plan Update. This is tentatively scheduled to be completed in 2016. Depending on the results of the update, another revision to the domestic sewage flow could be considered at that time.

Sincerely,

Hans Gross, P.Eng.
Director of Engineering Services
