The Study
In accordance with the Kitchener Growth Management Plan, the City of Kitchener is planning to develop the Laurentian West Phase 3b Community and surrounding area. In order to support development in this area, the City has identified the need for a new sanitary pumping station, and appurtenances, forcemain, sewer upgrades, and other related infrastructures, all referred to as the Ottawa-Trussler Area Sewage Facility. This study is to derive an appropriate catchment area and evaluate wastewater servicing alternatives for servicing growth in the Laurentian West Phase 3b community and surrounding area.

The Process

Upon completion of this study, an Environmental Study Report (ESR) documenting the process will be submitted to the Ministry of the Environment (MOE) and will be available for public review for a period of 30 calendar days.

Public Information Centre
Public Information Centre No. 2 will be held as a drop-in format:

Date: Wednesday, September 25, 2013
Time: 7:00 p.m. to 9:00 p.m.
Location: W.T. Townshend Public School, 245 Activa Ave, Kitchener, N2E 4A3

This PIC will present the results of the alternatives evaluation, as well as the preliminary preferred alternative design, and will provide an opportunity for public and government agency review and comment. Representatives from the City and the Consultant Team will be present to answer questions and discuss the next steps in this study.

Study Area Amendment
The study area was amended to capture all potential infrastructure included in the alternatives and potential environmental impacts. The study area was expanded to include the Mannheim Estates (west of Trussler Road) and an area immediately north and south of Ottawa Street South to the west of David Bergey Drive (as shown in the figure above). All properties within the amended study area have been sent this Notice.

Comments
Public consultation is vital to the Class EA process. The City wishes to ensure that anyone with an interest in this study has the opportunity to get involved and provide input before any decisions are made on a preferred concept for the Ottawa-Trussler Area Sewage Facility. With the exception of personal information, all comments will become part of the public record. To provide your comments or to request additional information concerning this project, please contact either of the following Project Team members:
