8.1 Land Use Plan

To support the implementation of the Key Directions and Strategies for built form and land use, a new land use framework has been created recommending new land use designations for the station area as well as showing new connections and public realm amenities. These land use designations should inform the development of a secondary plan for the station area, as well as related zoning by-law updates. A description of the intent of the different land use designations as well as an appropriate range of densities for each is provided on the opposite page.
